

VOC Training Course

As per MARPOL 73/78 Annex VI, Regulation 15.6

Purpose

As from 1st July 2010 all crude oil tankers need to have a VOC Management Plan (Volatile Organic Compounds) implemented.

This one-day training course covers all training requirements as given in Regulation 15.6.

Features

The course provides participants with a total understanding of VOC related challenges:

- Why and how control VOC?
- General and ship specific operational and technical options.
- Monitoring of VOC release.
- Hazards and safety related to VOC emission control.

Benefits

- A company specific training course tailored to suit your operational and technical solutions implemented on board.
- Enables the designated person to conduct cargo operations in accordance with the VOC Management Plan implemented by the company.
- Full compliance with MARPOL 73/78 ANNEX VI, Regulation 15.6
