

He checks everything before he leaves — do you?

Our Hull Integrity Management programme teaches your crew what to look for

DNV's Hull Integrity Management is a practical concept developed over six years with a proven track record. Based on DNV's knowledge and hull expertise, it empowers your ship's crew. It teaches them where to look and what to look for during regular on-board inspections. Hull Integrity Management helps in early detection of defects and in dealing with problems while they are small!
