

Docking Specification Review

Good specifications reduce cost

Purpose

To be better in control of the quality, cost, delivery time and risk of docking project.

Features

Extensive professional assessment of docking specification by DNV docking advisors.

DNV will co-ordinate the full breadth of the expertise available within DNV's organisation worldwide to provide you with the technical support you need.

To provide economic estimation and uncertainty of docking projects

To identify critical issues and priorities.

To provide support to less experienced superintendants.

Benefits

Reduced cost compared to inadequately specified repairs.

Better control of quality, progress and cost.

DNV often has the necessary drawings scanned and readily available on file for DNV Classed vessels.

DNV has full overview of docking facilities and local presence.

DNV has full knowledge of technical standards and requirements.

Takes full advantage of DNV's Hull Integrity Management System by facilitating complete and accurate docking specifications.
