

Ask DNV about ... Competence of Ships' Superintendents

Superintendents play a critical role in ship management. DNV, in consultation with the shipping industry, has identified the key competences required to successfully serve as a Superintendent.

Personnel Certification to the Standard of Competence for Ships' Superintendents is now being offered at test centres globally. Candidates are assessed on knowledge and understanding of General, Marine and Technical aspects of Superintending.

Individuals wishing to document own competence, Shipowners recruiting new superintendents or seeking more focused training efforts of existing superintendents benefit from this service.

For more information on Certification of Ships' Superintendents, please contact Mr Amit Ray, Area Manager for Asia, DNV SeaSkill at +65 6771 3157 or send an e-mail to amit.ray@dnv.com
