

Legionella risk assessors

Electrical safety testing

Installers of energy renewables

Tested for fire resistance

Environmental Management systems

Energy Management systems

Tested for air leakage, waterproofing, and acoustics

Asbestos surveyors

Waste management systems

Gas fitting operatives

Health & Safety Management systems

Crane and lift inspection

Onsite machinery safety inspections

Bricks, blocks, insulating products, lintels, slates & tiles tested

PEFC sustainable timber sourcing

Inspection of welding pressure vessels, and piping

Testing of construction products such as doors, windows and shutters

Inspection of signalling

Fire risk assessors

Rail interoperability

Dynamic pile tests to ensure safe foundations

Fatigue and stress testing of support structures

Steel tested

Road signs tested for reflectivity

Road tested for skid resistance

Aggregates tested

Testing soil and groundwater for compressibility, strength and contaminants

Sports & playground surfaces tested

STADIUM
